

AQUA SOLAR

SCHWIMMBAD- UND
FILTERTECHNIK

Manual DAISY+ Skid mounted Systems

Art. Nr.: 044003 & 044004 - Skimmer

Schematic

Explanation:

1. Effluent pipe from filter
2. Main drain (bottom)
3. Balance tank pipe (suction side)*
4. Skimmer drain*
5. Pressure pipe
6. Effluent pipe from main drain
7. Bypass/Valve to set speed in the measurement water circuit (set the pressure)

*Depending on the pool system (Overflow/Skimmer)

Aqua Solar

Skid mounted systems

Enclosure

1. Pump manual (Speck Badu 90 ECO VS 1.10 kW)
2. Hydrolyser manual (DA-GEN 90 FC)
3. Controller manual (AS Control 2)
4. Dosing Pump (Stenner Floc-Dos pump & Stenner Econ VX)
5. System information Dryden Aqua „Short summary“

Electrical Connection

On the back side of the Panel you will find the electrical connection Box (see picture).

Brown - Phase

Blue - Neutral

Yellow/Green - Earth

Differential pressure measuring water

On the picture you see the outlet (bottom) and the inlet of the measuring water (on top). With the Green (or white) valve you can increase the differential pressure to ensure (enough) flow through the measuring water circuit.

Prefilter

The Prefilter in the measuring water circuit has to be checked and if necessary cleaned regularly

Packing list - free parts

Manuals

Suction Lance

WIFI

Calibration liquids

Suction weight

Injection Valve

PE tube 6mm

Pump wrench

TDS Meter

Additional in Overflow Panels:

Level Sensor Set

Temperature Sensor (air)

Aqua Solar Skid mounted systems

Important notes:

- The positions of the pipes and the pipeholes may vary - each unit is a unique and hand made product!
- The Panel itself fits through a standard door.

*Depending on the filter size, the filter is wider than the panel. If the panel does not fit into a door you can remove the filter easily from the panel. You just need to unscrew the Besgo Valve from the filter.
